STABIOIL | ADDITIVE FOR SPECIAL BITUMINOUS EMULSIONS

1. APPLICATION
STABIOIL has the following properties:
- Is a flux oil for bitumen specially created for bituminous emulsion production.
- Is formed by a mixture of substances, exempt of tar oils, which guarantees a perfect balance between stability and breakage speed, and regulates the viscosity of the bitumen and the finished emulsion.
- Is added directly in the bitumen tank of the emulsion plant.

2. DOSAGE
STABIOIL's dosage can vary from 1% and 5% by bitumen weight, according to the desired emulsion.

3. COMPOSITION
Polyalkylate and stabilizer mixture.
