ITERLENE ACF 1000 | BITUMEN REGENERATOR

1. APPLICATION
ITERLENE ACF 1000 has the following properties:
- Is a multifunctional liquid additive which, dosed directly into the binder, permits to “regenerate” the milled bitumen used in the mix manufacturing.
- Carries out multiple functions towards the bitumen: antioxidant, plasticizer, regenerator, moisturizer, diluents and dispersant.
- Can be added directly in the storage bitumen cistern or in line during the production process.
- Acts as a high active antistripping agent towards the bitumen.

2. DOSAGE
ITERLENE ACF 1000 dosage varies from 0.4 to 0.6% by the added bitumen weight for every 10% of used milled material.

3. COMPOSITION
Modified Alkylamidopolyamine mix.

4. PHYSICAL PROPERTIES

<table>
<thead>
<tr>
<th>Property</th>
<th>Value</th>

<tbody>
<tr>
<td>Aspect</td>
<td>Fluid substance</td>
</tr>
<tr>
<td>Colour</td>
<td>Brown</td>
</tr>
<tr>
<td>Density at 20°C</td>
<td>0.91 ± 0.02 g/cm³</td>
</tr>
<tr>
<td>Viscosity at 25°C</td>
<td>60 ± 10 cP</td>
</tr>
<tr>
<td>Flash point</td>
<td>180°C</td>
</tr>
</tbody>
</table>
5. STORAGE
Sheltered from weather conditions.

6. PACKAGE
In drums of 200 Kg. or cistern of 950 Kg.

7. SAFETY PRECAUTIONS
See product's MSDS.
